

Frequently Asked Questions

Q: How tall are the panels?

A: The panel arrays would stand approximately 10-13 feet above ground level at the highest point.

Q: Will the Project Area be fenced?

A: The project's commercial-scale solar arrays and collection substation will be enclosed by a fence.

Q: Do solar energy projects make noise?

A: During the short construction period, noise at the Project Area would be typical of construction sites. Solar projects operate quietly during the operational period.
